# Explanation on Pension information

## Projection: Your possible annual pension

The following projections are based on the assumption that you will pay contributions up to the above-mentioned retirement age in the amount of the contributions paid in the previous year. If you have not made any contributions, a contribution of EUR 1,200.00 per year is assumed. Flexible contribution payments deviating from these values are possible up to the age of 68 and change the pension amount. Annual contribution payments above 8% of the income threshold for statutory pension insurance require prior approval.

The alternative calculations are based, on the one hand, on your current contract conditions (projection I) and, on the other hand, on an interest rate based on a realistic estimate of future investment income (projection II). Please refer to the following overview for details:

### Assumption of a contribution payment in the amount of EUR 8.145,82 EUR per year

	Projection I in EUR	Projection II in EUR
annual pension	20,744.76	21,607.44
monthly pension	1,728.73	1,800.62
<b>alternativ:</b>		
partial lump-sum payment	115,343.00	122,063.00
monthly pension	1,210.12	1,260.44

**Basis for calculation I:**  
Your tariff interest

**Basis for calculation II:**  
Your tariff interest incl. interest based on a realistic estimate of future investment income

**Important note:** Please note that the above amounts are not guaranteed and the final amount of your retirement benefits may differ from the projections. No claims against PKDW can be derived from this.
